Combining an aluminum boat lift with the power of a hydraulic engine and a safe 12 volt motor, we knew we were onto something special when we created our first hydraulic boat hoist in the mid eighties for our own watercraft. In time and with many refinements along the way, we turned our exciting new product into a company in 1989 with the introduction of the Genesis Sea Lift and Summit Marine.

Pro Riders

Summit Marine is proud to introduce you to our Pro Riders. We call them Pro Riders because of what they do on the water, we sponsor them because they're great people off the water. Their stories are as wild as their accomplishments are stellar, (their photos link to their websites). When you see them, go ahead and introduce yourself. They love to talk 'the sport' and help others reach their potential, whether it be learning a new trick, or how best to 'teach you' to 'teach your kids' tricks. While you're at it ask them how they like their Retract Boat Lift (make sure you have a lot of extra time for that)....
